I am a software developer with a unique and diverse background ranging from engineering to the arts. My technical skills and interests are suited for a broad range of industries, and I hope to work alongside, and learn from, a team of well-rounded developers.

Skills

Languages/Frameworks: Ruby, Rails, HTML/CSS, ActiveRecord

Systems/practices: Git, OAuth, Capybara, RSpec, Bootstrap, PostgreSQL

Projects

Pinspiration (group project)

<https://github.com/annadolan/pinspiration>

<https://the-real-pinspiration.herokuapp.com/>

Pinterest clone that also serves a JSON API for comments on pins.

Tech Stack: Rails, PostgreSQL, jQuery, Masonry (grid layout)

Root & Branch (group project)

https://github.com/annadolan/root_and_branch

<http://root-and-branch.herokuapp.com/>

Mock web store written in Rails, complete with user authentication and admin authorization and a functioning cart and checkout.

Tech Stack: Rails, PostgreSQL, Bootstrap

Rules Engine (pair project)

https://github.com/annadolan/rails_engine

Versioned JSON API that uses ActiveRecord to perform complex business intelligence with sales data.

Tech Stack: Rails, PostgreSQL
